- Woodblock Prints (Ukiyo-e): Visual media that disseminated cultural and political ideas across classes.
- Bunraku Puppet Theater: An oral and visual storytelling medium influencing societal perceptions.

These forms embodied community-centered, performative, and visual communication, emphasizing shared cultural identity over individualism.

The Meiji Restoration (1868) marked Japan's rapid modernization, including its media infrastructure:

- Print Media: Newspapers and magazines proliferated, fostering national discourse.
- Radio and Film: Introduced in the early 20th century, these technologies revolutionized information dissemination.

Key Theoretical Frameworks in Japanese Media Studies

Japanese media theory is characterized by an integration of Western models with indigenous perspectives, resulting in nuanced approaches to understanding media's role in society.

Culturalist Approaches and the "Cultural Sphere"

One dominant strand in Japanese media theory emphasizes the importance of culture in shaping media consumption and interpretation:

- Culturalism posits that media messages are embedded within cultural codes, symbols, and social norms.
- The "Media as Cultural Artifacts" perspective views media texts as reflections of societal values, identity, and historical context.

This approach aligns with Japan's broader emphasis on collectivism, social harmony, and interpersonal relationships.

This perspective highlights the importance of interpersonal communication and social cohesion, key values in Japanese society.

Japan's pioneering use of technology has also influenced media theory:

- The "Techno-Communication" paradigm examines how technological advancements (e.g., mobile phones, high-speed internet, AI) transform communication practices.
